SOCIO - ECONOMIC DEVELOPMENT IN LABRADOR: A SELECT BIBLIOGRAPHY

DEPARTMENT OF RURAL, AGRICULTURAL AND NORTHERN DEVELOPMENT

GOVERNMENT OF NEWFOUNDLAND AND LABRADOR

PREFACE

In January 1984, the Department of Rural, Agricultural and Northern Development began preparation of a Comprehensive Development Proposal for Labrador. The rationale for this initiative stems from the relatively intense publicly sponsored development efforts which have occurred in Labrador over the last decade and the winding down of this activity with the expiry of several federal/provincial (Native People's Agreement, Coastal Labrador Community Development Agreement) and federal (Coastal Labrador Fisheries Development Program) development mechanisms in 1986/87. The intent of the process initiated by RAND is to determine the priorities for public investment in Labrador for the future and to provide a rational and comprehensive vehicle to guide development activity.

The Development Proposal or Plan actually includes a number of documents which serve to provide context, support and elaboration of the rationale for the central document which is of course the development plan itself. These documents include a review of the 1979 Labrador Development Proposal or "Red Book", a review of the implementation and status of the recommendations of the Royal Commission Report on Labrador, and an inventory of federal/provincial projects carried out in Labrador between 1974-1984.

In addition, this bibliography of socio-economic references has been prepared both as a contextual and supporting component in the larger process. This document does not claim to be exhaustive, firstly, because it deals primarily with social and economic issues and secondly, because there may well be additional references which should be included but have been overlooked.

Despite this caveat, every effort has been made to ensure the completeness of the bibliography and to indicate

where references may be found. An abbreviated "source key" follows each reference indicating at least one location. This does not preclude the possibility of course, that references may be found in multiple locations.

Finally, although this bibliography was prepared as part of the larger process of developing a Labrador Development Plan, it is a discrete and useful document into itself. It is hoped that it will prove useful to anyone interested in Labrador issues.

ACKNOWLEDGEMENTS

The assistance of the Labrador Institute of Northern Studies and its Executive Director, Mr. Tony Williamson, is gratefully acknowledged.

NORDCO LTD. An operational Demonstration of a Versal Ice Management System for Lake Melville and Approaches. Prepared for the Dept. of Development and DREE. Oct. 1982.
Study objective was to illustrate the present operational capacity to utilize remote sensed data to provide ice analysis, ice forecasting and ship routing services to a ship transiting the Labrador pack ice. The results are to be used as an aid in determining the technical feasibility, cost and risk associated with winter long shipping into Lake Melville. (Ind. Dev. Lib.).

NORDCO LTD. Lake Melville/Offshore Labrador Year Round Navigation Study, 1978-1979.
Study investigates the feasibility of winter navigation into Lake Melville. Identifies the major impediments as being the landfast ice in the Lake and the pack ice along the coast. Main focus is on ice conditions and the ability of different icebreakers and bulk carriers to operate in an ice environment. Demonstrates that year round access is feasible. (Ind. Dev. Lib.).
